Heavy Duty PVC Fabric Reinforced Suction & Discharge Hose with High UV Resistance

General Applications:
- Fish suction
- Irrigation lines
- Pumps, rental and construction dewatering
- Pumps, trash
- Suction and discharge
- Water suction – heavy duty

Service Temperature: -4°F (-20°C) to 150°F (+65°C)*

Features and Advantages:
- Advanced UV Protection! – The hose material is specially formulated to resist the cracking that can result from exposure to damaging UV light. Our tests show the Solarguard material retained 97% of its original tensile strength after prolonged UV exposure, compared to only 55% tensile strength retention for similar PVC hoses.†

- Advanced Transparent UV Protected Construction – “See-the-flow.” Allows for visual confirmation of material flow.

- Fabric Reinforcement – High tensile strength polyester yarn jacket to handle both suction and higher pressure discharge applications.

- Easy Slide “Safety Yellow” Helix – Highly visible yellow color helps to easily identify hose. Rigid helix design protects hose tube from cover wear and allows hose to slide easily over rough surfaces.

- Phthalate Free
